I'm driven to create captivating user interfaces that strike the perfect balance between aesthetics and functionality. An experienced professional with nearly 2 years of experience in Information Technology and services industry. Major skills include, User Experience Design, Interaction Design, Mobile Design, Web Applications Design, Coding skill set. Adept in leading 5 stages of design thinking process such as Empathizing, Defining, Ideation and conducting brainstorming sessions, Prototyping to start building or creating a solution and TestingI have a strong passion for learning and actively seek out new opportunities to expand my knowledge and skills.

QUALIFICATIONS

Bachelors in Information Technology (IT)
Certification in UI/UX Design

INTERESTS

Sketching | Playing Badminton | Travelling

EXPERTISE

UI Design | UX Design | Branding |

Sketching | Graphic Design

HTML, CSS, JavaScript, React, Angular

CREATIVE TOOLSET

Adobe XD | Figma | Visual Studio

INDUSTRY DOMAINS

Financial Services | Education |
Management | AR/VR

RECENT ENGAGEMENTS

01 **Day Plannar**

This application is designed to help students and workers maximize their time. This application contains several features so that users can plan their day productively and achieve their goals.

02 **WM**

WASTE MANAGEMAENT

Using a tool called Scenario planning tool, a waste management company with headquarters in the USA estimates and calculates forecasts for reductions in greenhouse gas emissions through careful monitoring and calculation on the current tool, which is an Excel spreadsheet with various formulas and standards based on the SWICS model.

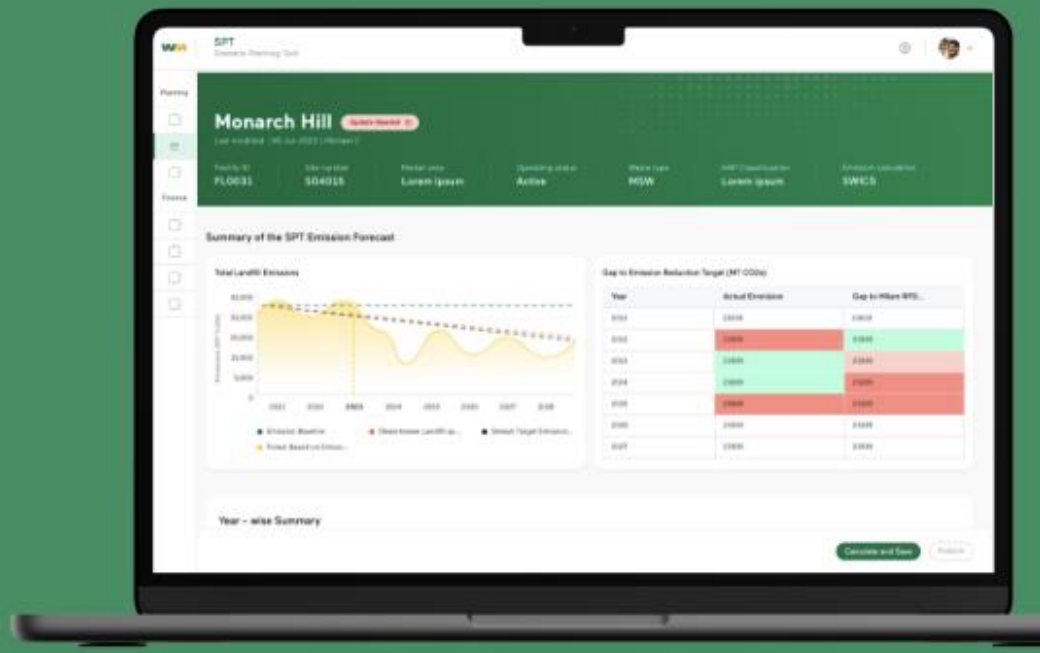
WM – WASTE MANAGEMAENT

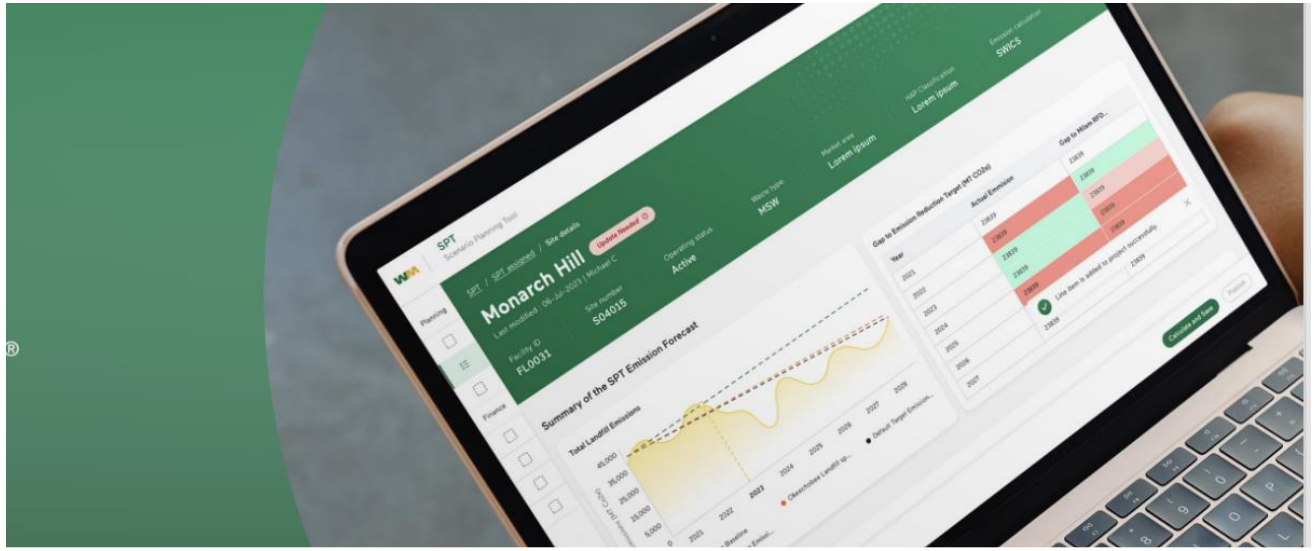


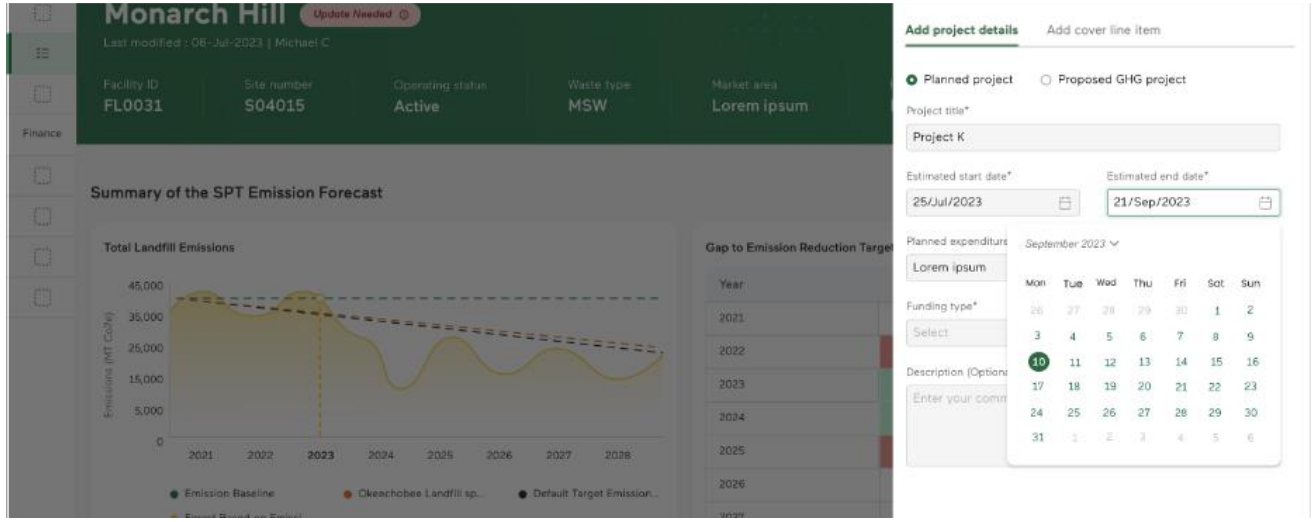
WONGDOODY | WASTE MANGEMAENT

DESCRIPTION

A waste management company based in the USA uses a tool called Scenario planning tool for estimating and calculating forecasts for Greenhouse Gas Emissions reductions through closely monitoring and calculation on the existing tool which is on Excel with different formulas and standards based on the SWICS model.

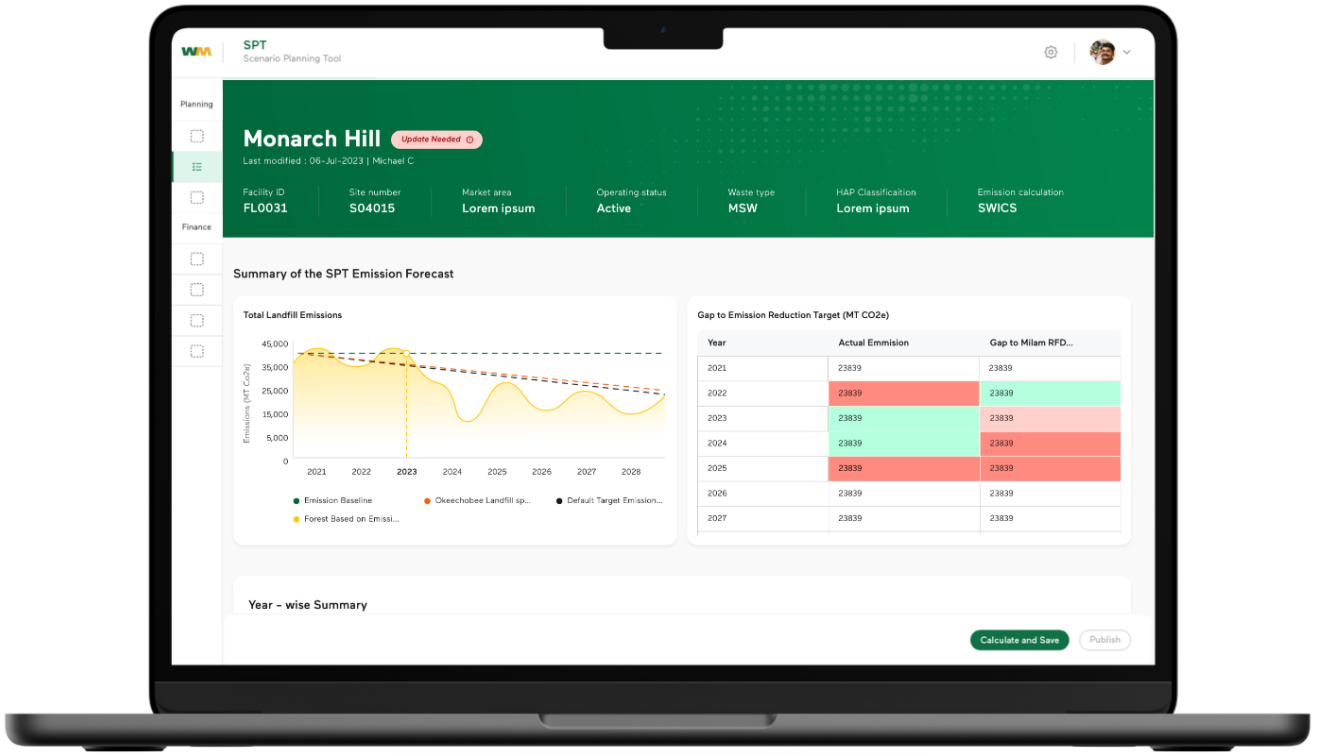
The Ask was to transform the calculation done on Excel sheet to Application experience with advanced way of calculation collaboration and monitoring of all the sites available in the USA and Canada.





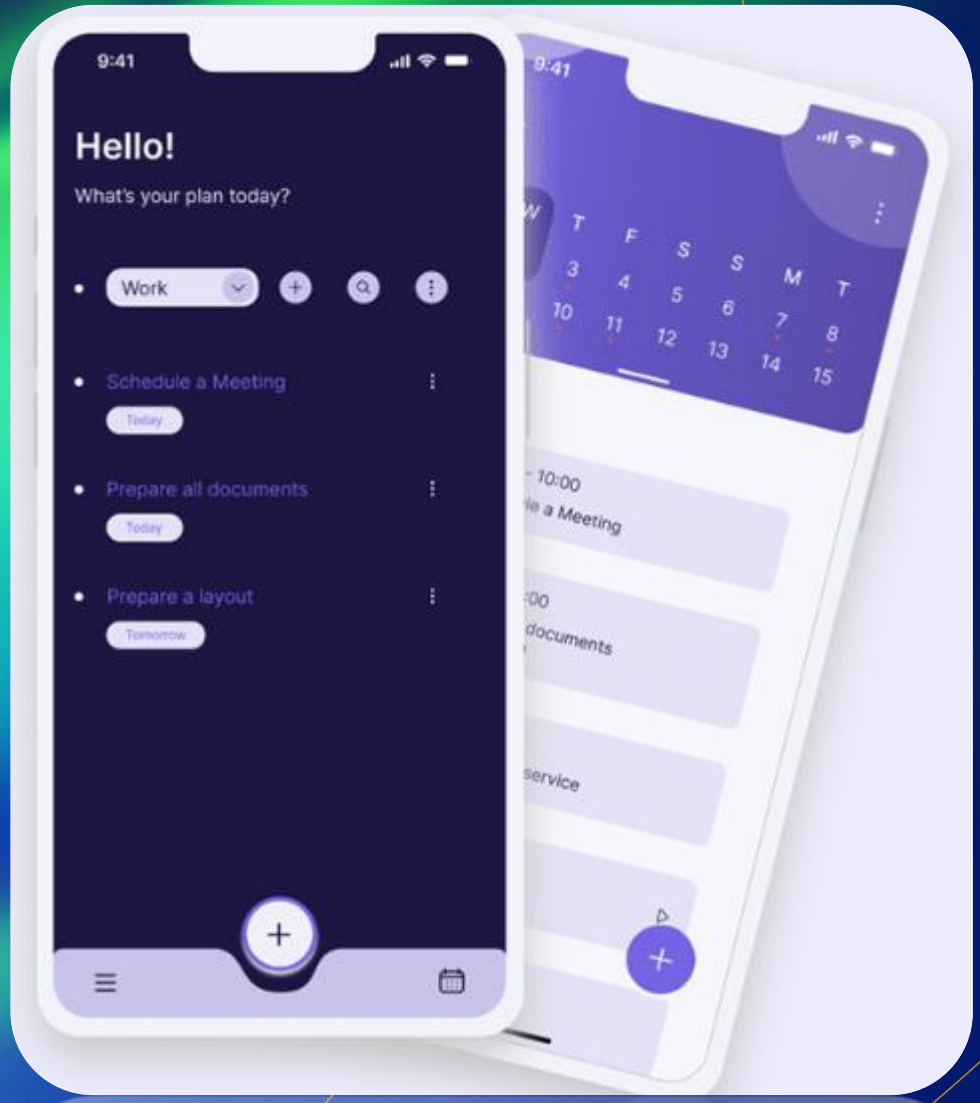
MY CONTRIBUTION TO WM

- Gathering requirements from recorded discovery workshops.
- Understanding current tool, User journey, pain points of users, goals etc. and map based on features prioritisation map.
- Convert/design gathered requirements in the form of wireframes and get feedback from the Client consistently.
- Delivered Visual design, prototype link for feedback and designed a design library for the Dev team.
- Collaborated with stakeholders, clients and frontend, backend and Data Architecture teams.



Day Planna – Day Planner Assistant

Personal Project



WONGDOODY |

DESCRIPTION

This application is designed to help students and workers maximize their time. This application contains several features so that users can plan their day productively and achieve their goals.

PROBLEM STATEMENT

Design Personal Assistant to help the commuter multi-task and manage daily task to increase productivity

Branding –
Divine Distributors

Personal Project

DESCRIPTION

Transforming the identity of DIVINE DISTRIBUTORS, we infused a touch of royalty and elegance into their brand. Our design mastery elevated their presence with regal aesthetics, ensuring their brand stands out with sophistication and grandeur. The result is a sophisticated, eye-catching premium branding that speaks volumes about their excellence and prestige.

Every element, from logo to color palette, radiates an air of elegance and grandeur, which turned out into a beacon of luxury and sophistication. This striking branding not only captivates but also positions Divine Distributors as a leader in their field, embodying supreme quality and elegance.

Thank You
